COMMENT “LINKEDIN” GUIDE

Claude se chalao apna LinkedIn

LinkedIn Agent skill: 11 free Claude skills: posts, comments, replies, profile, weekly plan aur humanizer. Poora setup 10 minute mein.

Tumne “LINKEDIN” comment kiya tha, ye rahi guide 🎁 · @aiwith.om · Oct 2026

Ye kya hai?

LinkedIn Agent ek free, open-source (MIT) Claude skill pack hai. Isme 11 skills hain jo tumhara LinkedIn content likhti hain. No signup, no API key, kuch connect nahi karna.

LinkedIn Agent skill (official repo)
`github.com/Jakeschincariol/linkedin-agent-skill`

⚠️ **Sabse important rule:** ye skills sirf **likhti** hain. Post tum karoge. Kuch bhi apne aap post nahi hota, aur yahi tumhara account safe rakhta hai.

Install (3 tarike, koi ek chuno)

1

Sabse easy: Claude mein paste karo

Claude Code ya Claude app mein ye message bhejo:

```
https://github.com/Jakeschincariol/linkedin-agent-skill
Install this skill, then confirm /li-post works.
```

2

Claude Code mein khud

Terminal mein:

```
git clone https://github.com/Jakeschincariol/linkedin-agent-skill.git
cp -r linkedin-agent-skill/skills/li-* ~/.claude/skills/
```

3

Plugin ki tarah

Claude Code ke andar:

```
/plugin marketplace add Jakeschincariol/linkedin-agent-skill
/plugin install linkedin-agent
```

💡 Claude Code nahi hai? Kisi bhi ek skill ka `SKILL.md` chat ke top pe paste karo, wo mode ki tarah chalegi (humanizer ke Python tools nahi chalenge, baaki sab chalega).

Step zero: apni "voice" set karo (10 min)

Ye skip kiya to sab posts sabke jaise lagenge. Repo ka `templates/voice.md` copy karo `~/.claude/linkedin/voice.md` mein aur bharo. Shortcut:

01 Voice file banao COPY

```
Ye mere 3 LinkedIn posts hain. Inse mera voice.md likho: tone, sentence length, words jo main use karta hoon, words jo kabhi nahi, aur mera audience kaun hai.

[POST 1]
[POST 2]
[POST 3]
```

11 commands, kab kaunsa

Command	Kya karta hai
`/li-post`	Ek idea → 3 hook options (21 formulas se) + 1 full draft, humanized
`/li-comment`	Dusron ke posts pe meaningful comments (kabhi "Great post!" nahi)
`/li-reply`	Tumhare post ke comments ko lead / peer / noise mein sort karke replies
`/li-profile`	Profile ko 100 mein score + fix-first rewrite
`/li-plan`	Poore hafte ka plan: kya post, kab, aur kin 10 logon se engage
`/li-human`	Humanizer: AI wale patterns, em dashes, hidden characters hatata hai + 5-check score
`/li-carousel`	Carousel/document post: slide copy + PDF
`/li-repurpose`	Ek video/newsletter → hafte bhar ke posts
`/li-dm`	Invite note (200 chars), pehla message, 2 follow-ups
`/li-inbox`	Inbox triage: lead / recruiter / peer / spam
`/li-audit`	Purane posts ka post-mortem: kya chala, kyun

Weekly routine (30 min / hafta)

1. **Monday:** `/li-plan` chalao, hafte ka plan lo.
2. **Har post se pehle:** `/li-post [idea]` → hook chuno → draft ko apne words mein edit karo → khud post karo.
3. **Post ke baad 1 ghanta:** `/li-reply` se comments ka jawab (khud paste karo).
4. **Roz 10 min:** plan wale 5 logon pe `/li-comment` se draft, edit karke daalo.
5. **Friday:** `/li-audit` se seekho kya chala.

Safe rehne ke rules

- LinkedIn ke user agreement mein bots/automation allowed nahi. **Copy-paste khud karo**, koi auto-posting tool mat jodo.
- Ek din mein dher saare comments mat karo, natural pace rakho.
- Har draft ko apne words mein thoda edit karo: humanizer help karta hai, lekin final voice tumhari.
- Kisi ke DM mein copy-paste spam mat karo.

Aur aise free AI tools chahiye?
