COMMENT “META” GUIDE

# Meta tumhare ads khud badal raha hai

28 October: "product browsing" existing ads pe by default ON. Kya badlega, opt out kaise karein, aur ON rakhna ho to kya track karein.

Tumne “META” comment kiya tha, ye rahi guide 🎁 · @aiwith.om · Oct 2026

# Kya badal raha hai?

**Product browsing** ek Advantage+ creative option hai. ON hone pe ad tap karne wala seedha tumhari website nahi jaata, pehle Facebook/Instagram ke andar ek shopping page khulta hai (catalog products, details, suggestions). Meta ise **28 October 2026** se chal rahe ads pe by default ON kar raha hai, jab tak tum opt out na karo.

| Point | Detail |
|---|---|
| Date | 28 October 2026: existing ads pe default ON |
| Meta ka claim | Test mein average ~3% zyada conversions (Meta ka apna number, independent nahi) |
| Kya nahi bataya | Order value, margin, naye ads (28 ke baad) pe default kya hoga, kaunse countries/formats |

# Opt out kaise karein

1. **Notice wala "Opt out" (28 se pehle)**

   Ads Manager / Business notifications mein Meta ka product browsing notice dhoondho aur **Opt out** dabao. Reports ke mutabiq ye button 28 ke baad kaam karna band kar sakta hai, aur ye clear nahi ki ye ek ad account cover karta hai ya sab, isliye **har ad account check karo**.

2. **Per-ad setting (kabhi bhi)**

   Ads Manager → ad level pe ad kholo → **Advantage+ creative** settings (aur Destination section) → **product browsing** toggle OFF → Publish. Ye 28 ke baad bhi kaam karta hai.

3. **Check karo**

   Har active campaign ke 1–2 ads khol ke dekho ki toggle OFF hai. Naye ads banate waqt bhi ye setting dekhna.

> 💡 Menu names thode alag dikh sakte hain (Meta UI badalta rehta hai). "Advantage+ creative" ya "Destination" section mein "product browsing" search karo.

# ON rakhna hai? Pehle test karo

1. Ek campaign duplicate karo: **A = OFF, B = ON**, same budget, same audience.
2. Kam se kam 7 din chalao.
3. Sirf "purchases" mat dekho, ye bhi dekho: **AOV (average order value), revenue, margin, website sessions, email/SMS signups**.
4. B jeete tab hi baaki ads pe ON karo.

# Claude se analysis

**01 A/B result analysis** COPY ⧉

```
Ye do Meta ad sets ka 7-din ka data hai (A = product browsing OFF, B = ON): [PASTE: spend,
impressions, link clicks, purchases, revenue, AOV].
Batao: (1) kaunsa jeeta aur kitne confidence se, (2) AOV/revenue pe kya asar, (3) kya data abhi
kam hai, (4) mera next step. Seedha jawab do, assumptions alag likho.
```

⚠️ Ye guide public reports pe based hai; Meta ka official help page check karo. Default setting = decision Meta ka. Apna decision **data** se lo.
