COMMENT “OMNIGET” GUIDE

OmniGet: ek free app, 1,800+ sites

Paid downloaders ka free, open-source alternative. Install, pehli launch warning, hotkey trick, aur kya download karna legal hai.

Tumne “OMNIGET” comment kiya tha, ye rahi guide 🎁 · @aiwith.om · Oct 2026

Ye kya hai?

OmniGet ek free, open-source (GPL-3.0) desktop app hai: link paste karo, file folder mein. YouTube, Instagram, X, TikTok, Pinterest aur 1,800+ sites (yt-dlp pe based). No account, no ads. Saath mein PDF reader, transcription, converters jaise tools bhi.

OmniGet (official repo)
`github.com/OpenSelena/omniget`

> 💡 Purana link `github.com/tonhowtf/omniget` ab nahi khulta. Project ab **OpenSelena/omniget** pe maintain hota hai (original architecture tonhowtf ka). Hamesha official Releases page se hi download karo.

Install

System	Kya download karein	Ya command
Windows 10/11	`..._x64-setup.exe` (installer) ya `..._x64-portable.exe`	`winget install -e --id OpenSelena.OmniGet`
macOS 10.15+	`..._aarch64.dmg` (M1+) ya `..._x64.dmg` (Intel)	`brew install --cask OpenSelena/tap/omniget`
Linux	`.deb` / `.rpm` / `.AppImage`	AppImage khud update hota hai

Releases page (sab downloads)
`github.com/OpenSelena/omniget/releases/latest`

Pehli launch warning (normal hai)

App paid certificate se signed nahi hai, isliye pehli baar warning aati hai:

- **Windows:** SmartScreen ka blue box → **More info** → **Run anyway**.
- **macOS:** "damaged" bole to Applications mein drag karne ke baad Terminal mein:

```
xattr -cr /Applications/omniget.app
codesign --force --deep --sign - /Applications/omniget.app
```

Use kaise karein

1

Link paste karo

App kholo → link paste karo → OmniGet site khud pehchanta hai → quality chuno → download.

2 **Hotkey trick** ⌨️

Kahin bhi link copy karo aur **Ctrl+Shift+D** (Mac: **Cmd+Shift+D**) dabao: download background mein shuru, app kholne ki zarurat nahi.

3 **Playlist / channel**

Playlist link do: saare videos ek saath queue ho jaate hain.

Legal kya hai? (zaroor padho)

⚠️ Sirf wahi download karo jo **tumhara hai**, **free/public-domain** hai, ya jiski **permission** hai. Dusron ke videos, paid courses ya movies bina permission download/share karna copyright ke khilaf hai, aur platforms ke terms bhi todta hai.

- ✅ Apne khud ke uploads ka backup
- ✅ Creative Commons / public-domain content
- ✅ Jahan creator ne download allow kiya ho
- ❌ Paid courses share karna, movies, dusron ka content re-upload

Aur aise free AI tools chahiye?
