COMMENT “AGENT” GUIDE

Claude ka apna WhatsApp agent

Kapso + Claude Code se booking wala WhatsApp agent: number, skills, prompt, aur WhatsApp ke 3 rules.

Tumne “AGENT” comment kiya tha, ye rahi guide 🎁 · @aiwith.om · Oct 2026

Kya banega?

Ek WhatsApp number jo raat ke 12 baje bhi customers ko reply kare, khaali slots dikhaye, booking kare aur reminder bheje. Ye **WhatsApp ki official Cloud API** pe chalta hai (Kapso ke through), to unofficial "QR hacks" wala ban risk nahi.

Kya chahiye

- Kapso account: **app.kapso.ai** (free plan available; current limits pricing page pe check karo)
- Claude Code (terminal) + Node.js
- Ek Meta Business account (number verify karne ke liye)
- Google Calendar (ya jo bhi calendar use karte ho)

Setup: 3 steps

1

Number lo

Kapso dashboard → **Phone numbers** → **Connect new number** → **Instant setup** (ya apna number). Meta ke pop-up mein apna verified number select karo → "Phone number connected" ✅.

2

Skills daalo

Terminal mein Kapso ki official agent skills install karo, phir API key set karo (key: app.kapso.ai → API keys):

```
npx skills add gokapso/agent-skills

export KAPSO_API_BASE_URL="https://api.kapso.ai"
export KAPSO_API_KEY="your-api-key"
```

Kapso agent skills (official, alpha)
github.com/gokapso/agent-skills

3

Bas bolo

Claude Code kholo (`claude`) aur ye prompt do:

01 Booking agent prompt COPY

```
Build me a WhatsApp agent that books appointments for my business using the Kapso skills.
Business: [naam, kya service], timings: [Mon-Sat 10am-7pm], slot length: [30 min], location:
[address/online].
Flow: greet in Hinglish → ask what service → show 2-3 free slots from my Google Calendar →
confirm → create calendar event → send confirmation → send a reminder 3 hours before.
If the customer asks something you can't answer, say a human will reply and notify me.
Don't send any message until I test it on my own number first.
```

💡 Pehle apne khud ke number se test karo: "Friday free ho?" bhejo aur poora flow check karo. Phir customers ke liye ON karo.

WhatsApp ke 3 rules (ignore mat karna)

1. **Sirf opt-in users**

   Message sirf unhe jinhone tumhe message kiya ya clearly "haan" bola. Kharidi hui lists ko message = number ban.

2. **24-hour window**

   Customer ke last message ke 24 ghante ke andar free-form reply. Uske baad sirf **Meta-approved templates** (reminders bhi template se).

3. **Billing**

   Meta ka pricing badalta rehta hai (reel ke time ki info: 1 Oct 2026 se service messages pe ek free limit ke baad charge). Apne country ka current rate Meta / Kapso pricing page pe check karo.

⚠️ Kapso skills "alpha" hain (tezi se badal rahi hain). Kuch kaam na kare to repo ka README dekho. Customer data (phone numbers, chats) safe rakho.
